

Implement the Erosion Morphological operations technique using Open CV in python.

Code:

```
import cv2, urllib.request

from google.colab.patches import cv2_imshow

# Download sample image
urllib.request.urlretrieve(

    "https://raw.githubusercontent.com/opencv/opencv/master/samples/data/lena.jpg",

    "img.jpg"

)

# Read image

img = cv2.imread("img.jpg")

# Create kernel

kernel = cv2.getStructuringElement(cv2.MORPH_RECT, (5,5))

# Apply erosion

erode = cv2.erode(img, kernel, iterations=1)

# Display images

print("Original Image")

cv2_imshow(img)

print("Eroded Image")

cv2_imshow(erode)
```

Output:
