

Design and implement a water marking technique to insert the watermark into the original effectively image using Open CV.

Code:

```
import cv2, urllib.request
from google.colab.patches import cv2_imshow
# Download sample image
urllib.request.urlretrieve(
    "https://raw.githubusercontent.com/opencv/opencv/master/samples/data/lena.jpg",
    "img.jpg"
)
# Read image
img = cv2.imread("img.jpg")
# Add watermark text
watermarked = cv2.putText(
    img.copy(),
    "WATERMARK",
    (50, 50),
    cv2.FONT_HERSHEY_SIMPLEX,
    1,
    (255,255,255),
    2
)
# Display images
print("Original Image")
cv2_imshow(img)
print("Watermarked Image")
cv2_imshow(watermarked)
```

Output:

Watermarked Image
