

**Implement a function to reverse the frames of the video to create a video in reverse mode using Open CV.**

**Code:**

```
import cv2, urllib.request

from google.colab.patches import cv2_imshow

# Download sample video
urllib.request.urlretrieve(
    "https://raw.githubusercontent.com/opencv/opencv/master/samples/data/vtest.avi",
    "video.avi"
)

# Read video
cap = cv2.VideoCapture("video.avi")

# Store frames
frames = []

while cap.isOpened():
    ret, frame = cap.read()
    if not ret:
        break
    frames.append(frame)

cap.release()

# Display video in reverse
for frame in reversed(frames):
    cv2_imshow(frame)
    if cv2.waitKey(30) & 0xFF == 27:
        break
```

**Output:**
