

Implement the image scaling techniques to resize the images to both bigger and small sizes

Code:

```
import cv2, urllib.request
from google.colab.patches import cv2_imshow
# Download sample image
urllib.request.urlretrieve(
    "https://raw.githubusercontent.com/opencv/opencv/master/samples/data/lena.jpg",
    "img.jpg"
)
# Read image
img = cv2.imread("img.jpg")
# Resize image
big = cv2.resize(img, None, fx=2, fy=2)
small = cv2.resize(img, None, fx=0.5, fy=0.5)
# Display images
print("Original Image")
cv2_imshow(img)
print("Bigger Image")
cv2_imshow(big)
print("Smaller Image")
cv2_imshow(small)
```

Output:

Original Image

Smaller Image
