

Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to erode using Erode function.

Code:

```
import cv2, urllib.request
from google.colab.patches import cv2_imshow
# Download sample image
urllib.request.urlretrieve(
    "https://raw.githubusercontent.com/opencv/opencv/master/samples/data/lena.jpg",
    "img.jpg"
)
# Read image
img = cv2.imread("img.jpg")
# Create kernel
kernel = cv2.getStructuringElement(cv2.MORPH_RECT, (5,5))
# Apply erosion
erode = cv2.erode(img, kernel, iterations=1)
# Display images
print("Original Image")
cv2_imshow(img)
print("Eroded Image")
cv2_imshow(erode)
```

Output:
